

MEK-A-CASE JR.

A casemaking system featuring protein gluing, suction positioning, electric edge folding and rolling pressing in one machine

• Features:

- Brass Glue application roller and Glue tray
- Independent homothermal impermeable heater unit
- Automatic water replenishing, stepless glue application speed
- Soft light table with center position
- Large air quantity suction for position assistance
- Flexible and fast to change different widths of spine guides
- Electric edge folding mechanism
- Adjustable rolling press pressure
- Soft rubber roller and a steel roller make the pressure uniform and constant & wrinkle-less covers
- Upper table for stacking cover materials, boards and spine inlays
- Ruggedly designed and built for heavy industrial use and trouble-free maintenance
- The base-of the machine is equipped with high load bearing Footmaster casters, making it convenient to move the machine and adjust its level and height

Technical Data

Max. Cover size	Up to 11.69" × 16.54" [A3]
Size of operation desk	38.6" x 18.35" [980 x 466]
Gluing width	20" [500]
Rotary press width	20" [500]
Power supply	220V/110V (Optional)
Machine dimensions	67.3" x 33.5" x 57" [1710 x 850 x 1450]
Machine weight	585 lbs.[265 kg]

Note: Technical data subject to change.
