

CHASE FOR A KENSOL 52T HOT FOIL STAMPING MACHINE

This *flip-up* chase, commonly used by library binders,
Speeds up stamping, operations,
Eliminates slug's damage and
Yields crisp and clean imprints.

Slugs are inserted in the slots and a slight twist of the handle locks slugs in place and keeps them there until released.

After slugs are inserted, chase is turned over and pushed into stamping head.

Slugs are not damaged and may be used over and over again because there are no sharp edges to cause damage or wear. Firmly locked slugs give crisp, sharp imprints.

Overall outside dimensions = 20.5" x 6" x 2"

Chase length = 13.5"

Slot width = 0.186"

Pitch = 0.375"

Slug length = 3.5"

Dovetail width = 4.5"

Dovetail length = 2.0"

Dovetail angle = 45°

Max, opening for slugs = 13"
